Knowing Global Environments brings together nine leading scholars whose work spans a variety of environmental and field sciences, including archaeology, agriculture, botany, climatology, ecology, evolutionary biology, oceanography, ornithology, and tidology.

Collectively their essays explore the history of the field sciences, through the lens of place, practice, and the production of scientific knowledge, with a wide-ranging perspective extending outwards from the local to regional, national, imperial, and global scales. The book also shows what the history of the field sciences can contribute to environmental history-especially how knowledge in the field sciences has intersected with changing environments-and addresses key present-day problems related to sustainability, such as global climate, biodiversity, oceans, and more.

Contributors to *Knowing Global Environments* reveal how the field sciences have interacted with practical economic activities, such as forestry, agriculture, and tourism, as well as how the public has been involved in the field sciences, as field assistants, students, and local collaborators.

Marjorie Calhoun:

As a scholar exactly feel bored to help reading. If their teacher questioned them to go to the library or to make summary for some e-book, they are complained. Just very little students that has reading's heart and soul or real their passion. They just do what the teacher want, like asked to the library. They go to presently there but nothing reading seriously. Any students feel that reading is not important, boring in addition to can't see colorful pics on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we want. Likewise word says, many ways to
