## **Aging and Older Adulthood** Joan T. Erber

Updated and substantially revised, the second edition of *Aging and Older Adulthood* reflects the most current scientific research and theoretical foundations that contribute to our understanding of aging and older adulthood.

- Updated content and references include recent neurological findings on brain structure and functioning as well as factors that influence cognitive functioning, health care, decision making, and social relationships
- Chapter opening vignettes engage students with real world illustrations of older adults, which relate to the concepts to come
- Applying Research boxes offer examples of current research findings that can be applied to the everyday lives of older adults
- Understanding Aging boxes highlight phenomena, such as “sundown syndrome” and “end-of-life desires,” which provide a deeper insight into the aging process
- Integrated themes of diversity, environmental influences on aging, and applications to everyday life relate the story of aging more directly to key concepts
- New Chapter 13 explores what older adulthood may look like in the future and ties together the author’s theoretical framework with views on positive aging
