**Design Economics for the Built Environment: Impact of Sustainability on Project Evaluation** Herbert Robinson, Barry Symonds, Barry Gilbertson, Ben Ilozor

The drive towards environmentally friendly buildings and infrastructure has led to a growing interest in providing design solutions underpinned by the core principles of sustainability to balance economic, social and environmental factors.

*Design Economics for the Built Environment: Impact of sustainability on project evaluation* presents new directions, reflecting the need to recognise the impact of climate change and the importance of sustainability in project evaluation. The aim is to provide a new approach to understanding design economics in the context of the changing policy environment, legislative and regulatory framework, and increasing economic, environmental and social pressure as result of the sustainability agenda.

The book follows a structured approach from theories and principles in the earlier chapters, to the practical applications and emerging techniques focusing on value and social, economic and environmental considerations in making design decisions. It starts with the policy context, building on various theories and principles such as, capital cost, value of design and resource-based theories, the new rules of measurement (NRM) to explore cost planning, the relationship between height and costs, key socio-economic and environmental variables for design appraisal, eco-cost/value ratio (EVR), whole life theory and the treatment of carbon emission as external costs, productivity and efficiency, fiscal drivers and legal framework for carbon reduction, procurement and allocation of risks in contracts.

Case studies, practical examples and frameworks throughout reinforce theories and principles and relate them to current practice. The book is essential reading for postgraduate students in architecture, building and quantity surveying and is also a valuable resource for academics, consultants and policy-makers in the built environment.

### **From reader reviews:**

#### **Theresa Smith:**

The ability that you get from Design Economics for the Built Environment: Impact of Sustainability on Project Evaluation will be the more deep you looking the information that hide into the words the more you get thinking about reading it. It does not mean that this book is hard to understand but Design Economics for the Built Environment: Impact of Sustainability on Project Evaluation giving you buzz feeling of reading. The author conveys their point in a number of way that can be understood through anyone who read it because the author of this e-book is well-known enough. This book also makes your own personal vocabulary increase well. Making it easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this specific Design Economics for the Built Environment: Impact of Sustainability on Project Evaluation instantly.

#### **Mary Nixon:**

Hey guys, do you wishes to finds a new book to read? May be the book with the concept Design Economics for the Built Environment: Impact of Sustainability on Project Evaluation suitable to you? Typically the book was written by well-known writer in this era. The actual book untitled Design Economics for the Built Environment: Impact of Sustainability on Project Evaluation is the one of several books in which everyone read now. This book was inspired many people in the world. When you read this guide you will enter the new age that you ever know previous to. The author explained their thought in the simple way, and so all of people can easily to be aware of the core of this guide. This book will give you a lot of information about this world now. To help you see the represented of the world on this book.

#### **Lashunda McCloud:**

Spent a free time for you to be fun activity to accomplish! A lot of people spent their leisure time with their family, or all their friends. Usually they carrying out activity like watching television, planning to beach, or picnic in the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Could be reading a book could be option to fill your totally free time/ holiday. The first thing that you'll ask may be what kinds of book that you should read. If you want to consider look for book, may be the e-book untitled Design Economics for the Built Environment: Impact of Sustainability on Project Evaluation can be great book to read. May be it could be best activity to you.

#### **Sanjuanita Mecham:**

People live in this new moment of lifestyle always try to and must have the spare time or they will get wide range of stress from both daily life and work. So , when we ask do people have extra time, we will say absolutely yes. People is human not just a robot. Then we question again, what kind of activity are you experiencng when the spare time coming to anyone of course your answer can unlimited right. Then do you try this one, reading textbooks. It can be your alternative inside spending your spare time, often the book you

have read is Design Economics for the Built Environment: Impact of Sustainability on Project Evaluation.
