Therapeutic Antibody Engineering: Current and Future Advances Driving the Strongest Growth Area in the Pharmaceutical Industry (Woodhead Publishing Series in Biomedicine) William R Strohl, Lila M Strohl

The field of antibody engineering has become a vital and integral part of making new, improved next generation therapeutic monoclonal antibodies, of which there are currently more than 300 in clinical trials across several therapeutic areas. Therapeutic antibody engineering examines all aspects of engineering monoclonal antibodies and analyses the effect that various genetic engineering approaches will have on future candidates. Chapters in the first part of the book provide an introduction to monoclonal antibodies, their discovery and development and the fundamental technologies used in their production. Following chapters cover a number of specific issues relating to different aspects of antibody engineering, including variable chain engineering, targets and mechanisms of action, classes of antibody and the use of antibody fragments, among many other topics. The last part of the book examines development issues, the interaction of human IgGs with non-human systems, and cell line development, before a conclusion looking at future issues affecting the field of therapeutic antibody engineering.

- Goes beyond the standard engineering issues covered by most books and delves into structure-function relationships
- Integration of knowledge across all areas of antibody engineering, development, and marketing
- Discusses how current and future genetic engineering of cell lines will pave the way for much higher productivity

From reader reviews:

Michael Cooke:

The book Therapeutic Antibody Engineering: Current and Future Advances Driving the Strongest Growth Area in the Pharmaceutical Industry (Woodhead Publishing Series in Biomedicine) can give more knowledge and information about everything you want. Why must we leave a good thing like a book Therapeutic Antibody Engineering: Current and Future Advances Driving the Strongest Growth Area in the Pharmaceutical Industry (Woodhead Publishing Series in Biomedicine)? Some of you have a different opinion about book. But one aim that will book can give many details for us. It is absolutely proper. Right now, try to closer using your book. Knowledge or details that you take for that, you may give for each other; you could share all of these. Book Therapeutic Antibody Engineering: Current and Future Advances Driving the Strongest Growth Area in the Pharmaceutical Industry (Woodhead Publishing Series in Biomedicine) has simple shape however, you know: it has great and large function for you. You can appearance the enormous world by wide open and read a book. So it is very wonderful.

Mark Clark:

Here thing why this particular Therapeutic Antibody Engineering: Current and Future Advances Driving the Strongest Growth Area in the Pharmaceutical Industry (Woodhead Publishing Series in Biomedicine) are different and reliable to be yours. First of all studying a book is good nevertheless it depends in the content of it which is the content is as tasty as food or not. Therapeutic Antibody Engineering: Current and Future Advances Driving the Strongest Growth Area in the Pharmaceutical Industry (Woodhead Publishing Series in Biomedicine) giving you information deeper as different ways, you can find any guide out there but there is no guide that similar with Therapeutic Antibody Engineering: Current and Future Advances Driving the Strongest Growth Area in the Pharmaceutical Industry (Woodhead Publishing Series in Biomedicine). It gives you thrill examining journey, its open up your eyes about the thing which happened in the world which is probably can be happened around you. You can actually bring everywhere like in park your car, café, or even in your technique home by train. When you are having difficulties in bringing the paper book maybe the form of Therapeutic Antibody Engineering: Current and Future Advances Driving the Strongest Growth Area in the Pharmaceutical Industry (Woodhead Publishing Series in Biomedicine) in e-book can be your alternate.

Guadalupe Leatherman:

Reading a e-book tends to be new life style within this era globalization. With examining you can get a lot of information that could give you benefit in your life. Together with book everyone in this world can share their idea. Books can also inspire a lot of people. A great deal of author can inspire their particular reader with their story or perhaps their experience. Not only the storyplot that share in the books. But also they write about advantage about something that you need instance. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors on earth always try to improve their ability in writing, they also doing some study before they write with their book. One of them is this Therapeutic Antibody Engineering: Current and Future Advances Driving the Strongest Growth Area in

the Pharmaceutical Industry (Woodhead Publishing Series in Biomedicine).

Lloyd Stec:

What is your hobby? Have you heard this question when you got learners? We believe that that problem was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. So you know that little person like reading or as reading through become their hobby. You need to know that reading is very important in addition to book as to be the thing. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You see good news or update about something by book. A substantial number of sorts of books that can you decide to try be your object. One of them is Therapeutic Antibody Engineering: Current and Future Advances Driving the Strongest Growth Area in the Pharmaceutical Industry (Woodhead Publishing Series in Biomedicine).
