The text offers further details of plant identification; manual, mechanical, biological, and chemical control techniques; information and advice about herbicides; and suggestions for related ecological restoration and community education efforts. Also included are a glossary, a matrix of existing and potential invasive species in the Upper Midwest, an index with both scientific and common plant names, advice on agencies to contact with questions, and other resources. Department of Natural Resources Bureau of Endangered Resources and the University of Wisconsin-Madison Arboretum, and other invasive plant experts.
