Learn How to Properly Analyze Categorical Data
Analysis of Categorical Data with R presents a modern account of categorical data analysis using the popular R software. It covers recent techniques of model building and assessment for binary, multicategory, and count response variables and discusses fundamentals, such as odds ratio and probability estimation. The authors give detailed advice and guidelines on which procedures to use and why to use them.

The Use of R as Both a Data Analysis Method and a Learning Tool
Requiring no prior experience with R, the text offers an introduction to the essential features and functions of R. It incorporates numerous examples from medicine, psychology, sports, ecology, and other areas, along with extensive R code and output. The authors use data simulation in R to help readers understand the underlying assumptions of a procedure and then to evaluate the procedure's performance. They also present many graphical demonstrations of the features and properties of various analysis methods.

Web Resource
The data sets and R programs from each example are available at www.chrisbilder.com/categorical. The programs include code used to create every plot and piece of output. Many of these programs contain code to demonstrate additional features or to perform more detailed analyses than what is in the text. Designed to be used in tandem with the book, the website also uniquely provides videos of the authors teaching a course on the subject. These videos include live, in-class recordings, which instructors may find useful in a blended or flipped classroom setting. The videos are also suitable as a substitute for a short course.

From reader reviews:

Daniel Reynolds:

What do you consider book? It is just for students because they're still students or the idea for all people in the world, what the best subject for that? Simply you can be answered for that problem above. Every person has diverse personality and hobby for every other. Don't to be pushed someone or something that they don't desire do that. You must know how great and important the book Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science). All type of book can you see on many options. You can look for the internet methods or other social media.

Ray Chung:

Information is provisions for anyone to get better life, information these days can get by anyone from everywhere. The information can be a expertise or any news even a huge concern. What people must be consider if those information which is in the former life are challenging be find than now could be taking seriously which one is acceptable to believe or which one the resource are convinced. If you have the unstable resource then you have it as your main information you will see huge disadvantage for you. All of those possibilities will not happen with you if you take Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) as your daily resource information.

Donald Chen:

The reason? Because this Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) is an unordinary book that the inside of the publication waiting for you to snap this but latter it will shock you with the secret the idea inside. Reading this book adjacent to it was fantastic author who have write the book in such amazing way makes the content on the inside easier to understand, entertaining technique but still convey the meaning totally. So , it is good for you because of not hesitating having this any more or you going to regret it. This excellent book will give you a lot of positive aspects than the other book possess such as help improving your proficiency and your critical thinking method. So , still want to postpone having that book? If I had been you I will go to the publication store hurriedly.

Christopher Bohner:

Can you one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you just dont know the inside because don't determine book by its handle may doesn't work at this point is difficult job because you are frightened that the inside maybe not as fantastic as in the outside search likes. Maybe you answer might be Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) why because the excellent cover that make you consider concerning the content will not disappoint an individual. The inside or content is fantastic as the outside or perhaps cover. Your reading 6th sense will directly guide you to pick up this book.
