## **Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science)** Jean-Claude Junqua, Jean-Paul Haton

Foreword Looking back the past 30 years, we have seen steady progress made in the area of speech science and technology. I still remember the excitement in the late seventies when Texas Instruments came up with a toy named "Speak-and-Spell" which was based on a VLSI chip containing the state-of-the-art linear prediction synthesizer. This caused a speech technology fever among the electronics industry. Particularly, applications of automatic speech recognition were rigorously attempted by many companies, some of which were start-ups founded just for this purpose. Unfortunately, it did not take long before they realized that automatic speech recognition technology was not mature enough to satisfy the need of customers. The fever gradually faded away. In the meantime, constant efforts have been made by many researchers and engineers to improve the automatic speech recognition technology. Hardware capabilities have advanced impressively since that time. In the past few years, we have been witnessing and experiencing the advent of the "Information Revolution." What might be called the second surge of interest to commercialize speech technology as a natural interface for man-machine communication began in much better shape than the first one. With computers much more powerful and faster, many applications look realistic this time. However, there are still tremendous practical issues to be overcome in order for speech to be truly the most natural interface between humans and machines.

**From reader reviews:**

**Jane Riley:**

In this 21st hundred years, people become competitive in most way. By being competitive at this point, people have do something to make these survives, being in the middle of the crowded place and notice by surrounding. One thing that occasionally many people have underestimated that for a while is reading. Yes, by reading a publication your ability to survive improve then having chance to endure than other is high. In your case who want to start reading a book, we give you this Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science) book as basic and daily reading guide. Why, because this book is more than just a book.

**Mary Oropeza:**

The feeling that you get from Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science) will be the more deep you searching the information that hide within the words the more you get considering reading it. It does not mean that this book is hard to know but Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science) giving you excitement feeling of reading. The author conveys their point in particular way that can be understood simply by anyone who read this because the author of this reserve is well-known enough. This particular book also makes your own vocabulary increase well. So it is easy to understand then can go along with you, both in printed or e-book style are available. We advise you for having that Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science) instantly.

**Tonia Lee:**

Playing with family within a park, coming to see the ocean world or hanging out with good friends is thing that usually you have done when you have spare time, subsequently why you don't try thing that really opposite from that. One particular activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science), you can enjoy both. It is fine combination right, you still desire to miss it? What kind of hangout type is it? Oh seriously its mind hangout guys. What? Still don't get it, oh come on its referred to as reading friends.

**Melissa Broussard:**

This Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science) is brand new way for you who has attention to

look for some information because it relief your hunger details. Getting deeper you on it getting knowledge more you know or perhaps you who still having tiny amount of digest in reading this Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science) can be the light food in your case because the information inside this book is easy to get by means of anyone. These books produce itself in the form which is reachable by anyone, yeah I mean in the e-book contact form. People who think that in book form make them feel tired even dizzy this publication is the answer. So you cannot find any in reading a e-book especially this one. You can find actually looking for. It should be here for a person. So , don't miss it! Just read this e-book sort for your better life in addition to knowledge.
