**Carrier Aircraft: 1917-Present (The Essential Aircraft Identification Guide)** Thomas Newdick  
Illustrated with detailed artworks of naval aircraft and their markings with exhaustive captions and specifications, *The Essential Aircraft Identification Guide: Carrier Air Power 1917–Present* is an extensively researched review of the equipment and organization of the world’s carrier-based air arms and their deployment in conflicts since the end of World War I. Featuring front-line fighters, bombers and attack aircraft as well as antisubmarine aircraft and helicopters, support aircraft and electronic warfare platforms, this book details the models of aircraft in service with each unit along with their individual and squadron markings.

Chapters are divided by nation, profiling the carrier aircraft of the US, the UK, France and Russia, as well as the smaller carrier-capable nations, including Canada and Australia. Tables include full lists of operating units for key aircraft (such as the F-14 Tomcat and Sea Harrier), and each chapter is preceded by details of carrier development, nation-by-nation, with specifications for key carrier designs (USS Nimitz, HMS Ark Royal), carrier profiles where appropriate, as well as tables of typical air wing components through the years, and details of combat operations (Korea, Vietnam, Falklands). Illustrated with more than 250 specially commissioned and up-to-date artworks, *The Essential Aircraft Identification Guide: Carrier Air Power 1917–Present* is an essential reference guide for modelers and any enthusiast with an interest in modern military aircraft.

## REVIEWS

“...excellent basic reference in this series of 'Essential Identification Guide' . I was intrigued to find a variety of aircraft I was not familiar with, so it is handy to have their basic details all presented in this way.”  
Military Modeling,
