Prevention of Intimate Partner Violence Sandra Stith

Stop intimate partner violence before it starts

Intimate partner violence touches everyone. With more than 1 million cases reported each year, this pervasive social problem has devastating effects on victims, families, and communities. *Prevention of Intimate Partner Violence* presents a comprehensive overview of the wide range of efforts and approaches that have been successful in preventing physical, emotional, and verbal abuse.

A growing frustration with the limits of therapeutic intervention and with the costs imposed on society by intimate partner violence has created a need for greater emphasis on state-of-the-art prevention programs that really work. *Prevention of Intimate Partner Violence* addresses the challenges of conducting and evaluating such programs, gaps that exist in programming and research, and future trends in those areas. A panel of domestic violence experts, researchers, and healthcare professionals examines how to change the ways individuals and the current health care system think about, and respond to, intimate partner violence; how to change the ways young people deal with anger in intimate relationships; and the ways society can support families to reduce the occurrence of violence in intimate relationships.

Prevention of Intimate Partner Violence examines:

- identifying risk factors
- the cost-benefit of universal and targeted programs
- the effectiveness of parenting, stress management, and substance abuse programs
- community capacity theory
- community development
- social networks
- media and public awareness campaigns
- healthcare screening programs
- and much more

Prevention of Intimate Partner Violence documents the effectiveness of prevention interventions, encouraging prevention specialists to use evidence-based interventions to enhance the effectiveness of their own work. This powerful book is an invaluable professional resource for social workers, family life educators, researchers, and practitioners.
