Economic Control of Quality of Manufactured Product (50th Anniversary Commemorative Reissue)

Shewhart Walter A.

Shewhart's groundbreaking paper, founding the science of statistical quality control or statistical process control (SPC), and having an enormous impact on the industrial societies. "Shewhart was concerned that statistical theory serve the needs of industry. He exhibited the restlessness of one looking for a better way. A man of science who patiently developed and tested his ideas and the ideas of others, he was an astute observer of developments in the world of science and technology. While the literature of the day discussed the stochastic nature of both biological and technical systems, and spoke of the possibility of applying statistical methodology to these systems, Shewhart actually showed how it was to be done; in that respect, the field of quality control can claim a genuine pioneer in Shewhart. His monumental work, Economic Control of Quality of Manufactured Product, published in 1931, is regarded as a complete and thorough exposition of the basic principles of quality control
