**Martens and Fishers (Martes) in Human-Altered Environments** Daniel J. Harrison, Angela K. Fuller, Gilbert Proulx

Martens and Fishers (Martes) in Human-Altered Environments: An International Perspective examines the conditions where humans and martens are compatible and incompatible, and promotes land use practices that allow Martes to be representatively distributed and viable. All Martes have been documented to use forested habitats and 6 species (excluding the stone marten) are generally considered to require complex mid- to late-successional forests throughout much of their geographic ranges. All species in the genus require complex horizontal and vertical structure to provide escape cover protection from predators, habitat for their prey, access to food resources, and protection from the elements. Martens and the fisher have high metabolic rates, have large spatial requirements, have high surface area to volume ratios for animals that often inhabit high latitudes, and often require among the largest home range areas per unit body weight of any group of mammals. Resulting from these unique life history characteristics, this genus is particularly sensitive to human influences on their habitats, including habitat loss, stand-scale simplification of forest structure via some forms of logging, and landscape-scale effects of habitat fragmentation. Given their strong associations with structural complexity in forests, martens and the fisher are often considered as useful barometers of forest health and have been used as ecological indicators, flagship, and umbrella species in different parts of the world. Thus, efforts to successfully conserve and manage martens and fishers are associated with the ecological fates of other forest dependent species and can greatly influence ecosystem integrity within forests that are increasingly shared among wildlife and humans. We have made great strides in our fundamental understanding of how animals with these unique life history traits perceive and utilize habitats, respond to habitat change, and how their populations function and perform under different forms of human management and mismanagement. This knowledge enhances our basic understanding of all species of Martes and will help us to achieve the goal of conserving viable populations and representative distributions of the world's Martes, their habitats, and associated ecological communities in our new millennium.

### **From reader reviews:**

#### **Charles Anthony:**

The book Martens and Fishers (Martes) in Human-Altered Environments give you a sense of feeling enjoy for your spare time. You can use to make your capable a lot more increase. Book can to be your best friend when you getting tension or having big problem using your subject. If you can make looking at a book Martens and Fishers (Martes) in Human-Altered Environments to be your habit, you can get more advantages, like add your capable, increase your knowledge about some or all subjects. It is possible to know everything if you like open up and read a e-book Martens and Fishers (Martes) in Human-Altered Environments. Kinds of book are several. It means that, science guide or encyclopedia or others. So , how do you think about this publication?

#### **Andrew Waite:**

The actual book Martens and Fishers (Martes) in Human-Altered Environments has a lot of information on it. So when you make sure to read this book you can get a lot of profit. The book was authored by the very famous author. Tom makes some research prior to write this book. This particular book very easy to read you can get the point easily after reading this article book.

#### **Joshua Matthews:**

That book can make you to feel relax. This specific book Martens and Fishers (Martes) in Human-Altered Environments was colourful and of course has pictures around. As we know that book Martens and Fishers (Martes) in Human-Altered Environments has many kinds or variety. Start from kids until youngsters. For example Naruto or Investigator Conan you can read and believe that you are the character on there. So , not at all of book are usually make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading which.

#### **Paul Lopez:**

A lot of reserve has printed but it differs from the others. You can get it by online on social media. You can choose the top book for you, science, comic, novel, or whatever through searching from it. It is named of book Martens and Fishers (Martes) in Human-Altered Environments. You can contribute your knowledge by it. Without leaving the printed book, it could add your knowledge and make you happier to read. It is most significant that, you must aware about book. It can bring you from one place to other place.
