View a Recorded Webinar Demonstration <http://go.jblearning.com/EHRdemo> Jones & Bartlett Learning is proud to offer Simulated Health Records Simplified, the EHR Learning Portal created and hosted by DataWeb Inc. It is a cloud-based EHR (Electronic Health Record) simulation that allows students access to four different pre-set roles within an ambulatory care setting. Students assume each role to learn all aspects of an EHR and work with patient data to each role's ability and permission level. The unique feature of the system is its ability to provide two seemingly dichotomous functions giving a consistent role-based user experience for all students completing a class assignment and, at the same time, giving the student the ability to uniquely interact with her own patients' records. By interacting with each of these roles the student gains an understanding of how each role impacts Meaningful Use reporting: Office Receptionist - Records a patient's personal and payer information and checks in a patient for an appointment. Certified Nursing or Medical Assistant - Records a patient's vital signs for an encounter (appointment) and other medical history. Doctor, Registered Nurse, Nurse Practitioner, Physician Assistant (other clinicians would use role) - Records and codes a patient's medical procedure history and creates and signs notes and orders. Practice Manager - Reviews patient records for billing/payer purposes. The online EHR simulation program includes the following student activities Create a Patient Record Create an Appointment Check in a Patient Record Patient Vital Signs Record Patient Medications Create a Patient Note Start the Patient Order Process Explore Patient Orders Complete a Patient Order Use Doctor Desktop to Manage Your Patient Care Load Sign Notes and Orders Update Reference Information View Patient Events Each new workbook includes an access code to the online EHR training system. Electronic or eBook formats of the workbook do not include access to the online EHR.
