Surface Ocean: Lower Atmosphere Processes: 187 (Geophysical Monograph Series)

Surface Ocean: Lower Atmosphere Processes: 187 (Geophysical Monograph Series)

Published by the American Geophysical Union as part of the Geophysical Monograph Series, Volume 187.

The focus of *Surface Ocean: Lower Atmosphere Processes* is biogeochemical interactions between the surface ocean and the lower atmosphere. This volume is an outgrowth of the Surface Ocean-Lower Atmosphere Study (SOLAS) Summer School. The volume is designed to provide graduate students, postdoctoral fellows, and researchers from a wide range of academic backgrounds with a basis for understanding the nature of ocean-atmosphere interactions and the current research issues in this area.

The volume highlights include the following:

- Background material on ocean and atmosphere structure, circulation, and chemistry and on marine ecosystems
- Integrative chapters on the global carbon cycle and ocean biogeochemistry
- Issue-oriented chapters on the iron cycle and dimethylsulfide
- Tool-oriented chapters on biogeochemical modeling and remote sensing
- A framework of underlying physical/chemical/biological principles, as well as perspectives on current research issues in the field.

The readership for this book will include graduate students and/or advanced undergraduate students, postdoctoral researchers, and researchers in the fields of oceanography and atmospheric science. It will also be useful for experienced researchers in specific other disciplines who wish to broaden their perspectives on the complex biogeochemical coupling between ocean and atmosphere and the importance of this coupling to understanding global change.

From reader reviews:

Harold Walsh:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to learn everything in the world. Each reserve has different aim or maybe goal; it means that publication has different type. Some people experience enjoy to spend their time to read a book. These are reading whatever they consider because their hobby is usually reading a book. Consider the person who don't like looking at a book? Sometime, man feel need book after they found difficult problem or perhaps exercise. Well, probably you should have this Surface Ocean: Lower Atmosphere Processes: 187 (Geophysical Monograph Series).

Raymond Langford:

People live in this new moment of lifestyle always make an effort to and must have the extra time or they will get lots of stress from both way of life and work. So , whenever we ask do people have spare time, we will say absolutely of course. People is human not really a huge robot. Then we consult again, what kind of activity are you experiencing when the spare time coming to you of course your answer may unlimited right. Then do you try this one, reading textbooks. It can be your alternative with spending your spare time, the actual book you have read is usually Surface Ocean: Lower Atmosphere Processes: 187 (Geophysical Monograph Series).

Robert Shaw:

What is your hobby? Have you heard this question when you got learners? We believe that that query was given by teacher to their students. Many kinds of hobby, Every person has different hobby. And also you know that little person similar to reading or as reading become their hobby. You should know that reading is very important along with book as to be the factor. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You get good news or update regarding something by book. Amount types of books that can you decide to try be your object. One of them is this Surface Ocean: Lower Atmosphere Processes: 187 (Geophysical Monograph Series).

Tyler Dean:

Reading a guide make you to get more knowledge as a result. You can take knowledge and information originating from a book. Book is written or printed or illustrated from each source in which filled update of news. With this modern era like currently, many ways to get information are available for you. From media social including newspaper, magazines, science book, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just trying to find the Surface Ocean: Lower Atmosphere Processes: 187 (Geophysical Monograph Series) when you necessary it?
