Topics in Fractional Differential Equations: 27 (Developments in Mathematics) Saïd Abbas, Mouffak Benchohra, Gaston M. N'Guérékata

?? Topics in Fractional Differential Equations is devoted to the existence and uniqueness of solutions for various classes of Darboux problems for hyperbolic differential equations or inclusions involving the Caputo fractional derivative. ?? Fractional calculus generalizes the integrals and derivatives to non-integer orders. During the last decade, fractional calculus was found to play a fundamental role in the modeling of a considerable number of phenomena; in particular the modeling of memory-dependent and complex media such as porous media. It has emerged as an important tool for the study of dynamical systems where classical methods reveal strong limitations. Some equations present delays which may be finite, infinite, or state-dependent. Others are subject to an impulsive effect. The above problems are studied using the fixed point approach, the method of upper and lower solution, and the Kuratowski measure of noncompactness. This book is addressed to a wide audience of specialists such as mathematicians, engineers, biologists, and physicists. ?

From reader reviews:

Jennifer Carter:

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite book and reading a book. Beside you can solve your trouble; you can add your knowledge by the publication entitled Topics in Fractional Differential Equations: 27 (Developments in Mathematics). Try to make the book Topics in Fractional Differential Equations: 27 (Developments in Mathematics) as your pal. It means that it can to become your friend when you experience alone and beside those of course make you smarter than ever. Yeah, it is very fortunated for you. The book makes you a lot more confidence because you can know every thing by the book. So , let me make new experience and knowledge with this book.

Whitney Mallard:

Spent a free time to be fun activity to try and do! A lot of people spent their leisure time with their family, or their very own friends. Usually they accomplishing activity like watching television, about to beach, or picnic from the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your own personal free time/ holiday? Could be reading a book is usually option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to test look for book, may be the publication untitled Topics in Fractional Differential Equations: 27 (Developments in Mathematics) can be good book to read. May be it could be best activity to you.

Marylouise Potter:

Reading a book to become new life style in this calendar year; every people loves to examine a book. When you read a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your research, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, these kinds of us novel, comics, along with soon. The Topics in Fractional Differential Equations: 27 (Developments in Mathematics) will give you new experience in reading a book.

Terry Speller:

Reading a reserve make you to get more knowledge from the jawhorse. You can take knowledge and information coming from a book. Book is created or printed or created from each source in which filled update of news. On this modern era like right now, many ways to get information are available for an individual. From media social like newspaper, magazines, science book, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just searching for the Topics in Fractional Differential Equations: 27 (Developments in Mathematics) when you necessary it?
