Clinical Thinking: Evidence, Communication and Decision-Making Chris Del Mar, Jenny Doust, Paul P. Glasziou

Clinicians are taught masses of facts, but not how to use them in the messy reality of patient care. This book provides a missing link between evidence and the clinical coalface. Though there are plenty of guides to evidence-based medicine, few explain how to build the information into patient oriented decision-making. *Clinical Thinking* allows you to think both logically and laterally about daily clinical issues and look at problems from different angles.

- Uses realistic scenarios, frameworks and models
- Takes you through the whole decision-making process, from observation and narrative to evaluating the best evidence for the individual situation
- Illustrations and flow charts help clarify this new approach
- These methods have been tried and tested by the authors, internationally respected general practitioners and teachers in primary care – all leaders in the evidence-based medicine movement

This book takes clinical medicine a big step forward in the direction of patient-focused practice!
