Tim Flannery

An Explorer's Notebook: Essays on Life, History, and Climate Tim Flannery

Best known today for *The Weather Makers*, his #1 international bestseller, Tim Flannery is one of the world's most influential scientists, a foremost expert on climate change credited with discovering more species than Charles Darwin. But Flannery didn't come to his knowledge overnight. With its selection of exhilarating essays and articles written over the past 25 years, *An Explorer's Notebook* charts the evolution of a young scientist doing fieldwork in remote locations to the major thinker who has changed the way we think about global warming.

In over thirty pieces, Flannery writes about his journeys in the jungles of New Guinea and Indonesia, about the extraordinary people he met and the species he discovered. He writes about matters as wide-ranging as love, insects, population, water and the stresses we put on the environment. He shows us how we can better predict our future by understanding the profound history of life on Earth. And he chronicles the seismic shift in the world's attitude toward climate change. *An Explorer's Notebook* is classic Flannery—wide-ranging, eye-opening science, conveyed with richly detailed storytelling.

“Tim Flannery is in the league of all-time great explorers like Dr. David Livingstone.”—Sir David Attenborough

Lynda Alford:

As a scholar exactly feel bored for you to reading. If their teacher asked them to go to the library in order to make summary for some guide, they are complained. Just little students that has reading's heart and soul or real their passion. They just do what the trainer want, like asked to go to the library. They go to right now there but nothing reading really. Any students feel that examining is not important, boring in addition to can't

see colorful images on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this An Explorer's Notebook: Essays on Life, History, and Climate can make you really feel more interested to read.
